To advocate and promote the values of the urban forest to the community;
To develop and facilitate the exchange of information among a broad range of disciplines, relating to protecting, sustaining and enhancing the urban forest;
To promote research and education, including holding symposia;
To facilitate priority projects and programs that help build community and industry partnerships in the delivery of sustainable urban forests for all.

Your organisation’s membership provides a solid industry network that helps TREENET achieve these aims.

- To advocate and promote the values of the urban forest to the community;
- To develop and facilitate the exchange of information among a broad range of disciplines, relating to protecting, sustaining and enhancing the urban forest;
- To promote research and education, including holding symposia;
- To facilitate priority projects and programs that help build community and industry partnerships in the delivery of sustainable urban forests for all.

Invitation to Institutional Membership

Institutional Membership (Association) is open to all not-for-profit and professional associations that support research and education relating to urban trees and who value representation in the growing network of urban forest professionals that is TREENET.
